

PROBLEM STATEMENT

<p><u>Position and image of the drowning</u></p> <p><u>Recording of events</u></p> <p><u>An additional level of security</u></p>	<ul style="list-style-type: none">❖ When it comes to swimmers in trouble, every second counts. VirtualEye LifeGuard makes itself heard loud and clear in case of danger.❖ In addition, virtualEye's advanced technology can provide real-time location and image of the danger, making rescue operations easier.❖ The virtualEye LifeGuard system is able to record all the activities in the pools and to classify critical situations from normal ones in order to keep track of what happened.❖ Thanks to its advanced image archiving system, virtualEye LifeGuard meets the legislative requirements for the protection of personal data.❖ The protection of swimmers is ensured to all facilities by a vigilance provided by personnel assigned to control the activities carried out in the pools.❖ These controls have several critical points. The biggest problem is the difficulty in seeing the bottom of the pool.
<p><u>See for yourself how it works</u></p>	<ul style="list-style-type: none">❖ Seeing yourself as you really are can be an excruciatingly difficult process, but if you put the time and effort into it, meeting your real self can be an extremely rewarding experience.❖ In seeing yourself objectively and honestly, you can learn to accept

	yourself and figure out ways of improving yourself in the future.
